

2. Registered lines and departures

Clicking on the **Lines** field in the left drop-down menu opens the field for entering **Registered Lines** and **Price**:

The screenshot shows the application interface with the 'Linije' (Lines) section selected in the left sidebar. The main area displays a table of registered lines and a table of departures.

Relacija	Aktivna	Učestalost	Dodaj stanicu	Izmeni	Akt./Deakt.
Novi Pazar - Wien	Da	Svake nedelje	+	✎	✖
Novi Pazar - Grac	Da	Svake nedelje	+	✎	✖

Grad	Stanica	Polazak	Izmeni	Izbrisi
Novi Pazar	NP autobuska stanica	10:00	✎	✖
Beograd	BG autobuska stanica	15:00	✎	✖
Novi Sad	NS autobuska stanica	16:00	✎	✖
Grac	GC parkplac1	20:00	✎	✖
Wien	Stanica 43	22:00	✎	✖

By clicking on the **Line** field, then on **+ Line**, you get a field for entering basic data about a certain registered line:

The screenshot shows the application interface with the 'Linije' (Lines) section selected in the left sidebar. A modal form is open for editing a line. The modal has two tabs: 'Linija' and 'Učestalost'.

Linija

Polazna stanica: Novi Pazar

Vreme polaska: 10:30

Dolazna stanica: Berlin

Vreme dolaska: 22:00

Naziv linije: Novi Pazar - Berlin

Učestalost

Učestalost: Svake nedelje

Ponedeljak

Utorak

Sreda

Četvrtak

Petak

Subota

Nedelja

Sačuvaj Otkazi

Učestalost polazaka na datoj liniji može biti data putem dana u nedelji, u našem sličaju svakog ponedeljka i petka ili u vidu datuma u mesecu...

After clicking on **Save**, the basic data on the registered line are entered, however at that moment only the starting and last station in this case Novi Pazar and Berlin are saved, and then it is necessary to enter all intermediate stations in order. Interstations are entered by clicking on **+ Add station** next to the line name. You can also make changes to the basic line data in this window by clicking **BI** or **Activate** and **Deactivate** lines.

Clicking on **+ Add station** gives the following box, in which data on all intermediate stations are entered:

Entering Interstations creates a timetable for the registered line, which can be seen in the right window. Where intermediate stations can be deleted or modified at any time:

By entering all the intermediate stations of the registered line, the next step is entering the prices, this is done by clicking on Prices, and then the name of the line in the left part of the box gives all possible combinations between the regions in the registered line. In this case, clicking on **Novi Pazar - Berlin** in the left half of the window opens combinations of regions in which you need to enter prices:

The screenshot displays a web application for managing bus line prices. The interface includes a sidebar with navigation options and a main content area with two tables. The 'Linija' table lists routes, and the 'Cene' table lists price points for various routes. A modal window is open for adding or editing prices for the 'Novi Pazar - Berlin' route.

Relacija	Generiši	Polazni region	Dolazni region	Cena	Cena (pov)	Izmeni cenu
Novi Pazar - Wien	<input checked="" type="checkbox"/>	Novi Pazar	Beograd	0	0	<input checked="" type="checkbox"/>
Novi Pazar - Grac	<input checked="" type="checkbox"/>	Novi Pazar	Austrija	0	0	<input checked="" type="checkbox"/>
Novi Pazar - Berlin	<input checked="" type="checkbox"/>	Novi Pazar	Berlin	0	0	<input checked="" type="checkbox"/>
		Beograd	Austrija	0	0	<input checked="" type="checkbox"/>
		Beograd	Berlin	0	0	<input checked="" type="checkbox"/>
		Austrija	Berlin	0	0	<input checked="" type="checkbox"/>

The price is entered for each combination and can be entered in euros or dinars. If the amount in dinars is entered, it will be automatically converted into euros and vice versa. The course is entered on the home page.

After entering all the prices, it can be said that all the data related to the registered line have been entered. Now you can start booking and selling tickets on this line.
